INFORMATION

PRICES for the fall 1928—spring 1929 season are covered by this List No. 28, which cancels all former catalogs. Net f. o. b. Portland or nursery shipping station. Remittance with order unless terms are previously arranged.

LOCATION—City display and sales grounds and office, 220 Second Street, corner Salmon, phone Atwater 1927. Nurseries at Durham, Oregon Electric Railway, 11 miles south. By auto from Portland, out Sixth Street, Terwilliger Boulevard and Newberg Highway, about 8 miles to Red Rock Cheese Factory, turn to left and keep straight ahead about 3 miles. Visitors welcome at the nurseries and display grounds.

CALIFORNIA BRANCH—Demand for our hardy stock has grown to such extent that an agency branch was necessary, and we have established display and sales grounds on Main Highway, 16 miles south of San Francisco, three miles north of Burlingame, Post Office address, J. B. PILKINGTON, Nurseryman, MILLBRAE, CALIF.

A large supply of select specimen Evergreens (Conifers), Broad Leaf and Deciduous Flowering Shrubs, Shade Trees, Vines and Plants are ready at all seasons and personal inspection and selection are earnestly solicited.

PLANTING SEASON—Usually from late October to early April, right through the winter, depending of course upon weather. Early planting is advisable—at any rate, place orders early so that selections made be reserved for delivery or shipment at any time desired.

GUARANTEE—We have been in the nursery business in Portland for 40 years. All plants shall be true to name, well grown and properly dug and packed and delivered to the transportation company in good order, after which our responsibility ceases. We assume no responsibility for failure due to after conditions over which we have no control. In case any plant through error prove untrue to name, we will replace without charge or refund not more than the original purchase price.

LANDSCAPE DEPARTMENT—Fully equipped and under trained and competent management, will make complete plans and specifications for the landscape operations of small or large estates. Simple planting suggestions for home grounds are made without charge, but where landscape problems require special visits, plans, specifications and draughting, study and so on, a reasonable charge must be made, consistent with the time and services rendered. We will be glad to go fully into detail with those who are interested in this.

BROAD LEAVED EVERGREEN TREES AND SHRUBS

The great beauty of the broad leaved evergreens, makes them most valuable for gardening purposes. Many are among our most spectacular and gorgeous flowering shrubs, while their broad, attractive leaves show out most effectively during the parts of the year when many trees and plants are without foliage. There is practically no end to the charming results that can be obtained by the liberal use of this class of plants, either as single specimens or in masses as well as both background and foreground—for the somber winter picture or the summer floral display. They generally thrive in shady or partially shaded places, giving finest foliage effects when so grown—with better flowers perhaps when grown in the sun.

Our climatic conditions in the Pacific Northwest are particularly congenial to this class of shrubbery and aid in obtaining wonderfully pleasing effects in foliage and flowers. Our Oregon State Flower, Oregon Grape (Mahonia Aquifolium) and the state of Washington's choice of the native Rhododendron prove conclusively the esteem in which they are held. My stock of these is particularly fine, home grown, thoroughly acclimated, and good results can be depended upon.
ABELIA RUPESTRIS—BEAUTIFUL FLOWERING EVERGREEN

Inches Each

Abelia Rupestris, pink tinged .................................. 20-30 $1.00
Abelia Rupestris .................................................. 30-40 1.50

A beautiful dark, glossy, small-leaved evergreen, medium height (3 to 5 feet), graceful spreading habit, bearing attractive clusters of little white flowers tinged pink through-out the entire summer until frost. Ideal for base or foundation planting.

Andromeda—See Chamaedaphne and Pieris.

Aralia, Japonica (Fatsia)—Like Rubber Plants, sturdy 2.00
Arbutus Unedo, Strawberry Tree ................................. 24-30 1.50
Aucuba Japonica, Japanese Laurel, green ...................... 12-15 1.00
Aucuba Japonica, Japanese Laurel, green ...................... 18-24 1.50
Aucuba Japonica Aureomaculata, Variegated .................. 12-15 1.00
Aucuba Japonica Aureomaculata, Variegated .................. 18-24 1.50

Azalea—See page 21.

Berberis—Barberry—

Mahonia—See Oregon Grape.
Darwin, Darwin’s Barberry ....................................... 15-20 .75
Dulcis, Box Leaved ................................................ 12-15 .75

Japonica, Japanese Mahonia ..................................... 12-18 1.00
Stenophylla .......................................................... 18-24 1.00
Stenophylla diversifolia .......................................... 18-24 1.00

Box Barberry—A novelty in hardy Barberry, for dwarf edging. Each, 50c; dozen, $5.00.

Buxus—

Arborescens, Boxwood, pyramidal form ....................... 18-24 2.00
Arborescens, Boxwood, pyramidal form ....................... 24-30 3.00

Few larger—prices on application.
Arborescens, Common Boxwood, round ......................... 10-12 1.50
Arborescens, Common Boxwood, round ......................... 12-15 1.75
Arborescens, Common Boxwood, round ......................... 15-18 2.00
Suffructicosa, Dwarf Boxwood ................................ 6-8 .35
Suffructicosa, Dwarf Boxwood ................................ 10 for $3.00

Camellia, sturdy plants 15-18 in., $2.00; 18-24 in., $3.00.

Double, semi-double and single flowered types, in separate colors, Reds, Deep Pink, Light Pink, Shell Pink, Variegated and White. Order by type and color or leave to our selection.

Chamaedaphne (Andromeda)—Fetter Bush—

medium .................................................................... 2.00

Choisya Ternata, Mexican Orange, Small, 75c, 18-24 1.50
Cotoneaster—
As a family, they cannot be overestimated, furnishing variety of foliage and habit that makes them favorites in landscape planting. Not entirely evergreen, they are so persistent in foliage that they are commonly classed as such. All flower pinkish white in spring, but their main beauty is in the masses of red or orange red berries carried through fall and winter. Simonsii or Shining Leaf is upright, tall, orange red berries, fine for background. Franchetti is tall but graceful drooping habit, fine foliage, usually evergreen, with masses of berries. Horizontalis is very hardy, flat or creeping growth, drops its foliage but loads up with red berries making bright color spots in winter. Microphylla is more tender, but evergreen small leaves, dark and glossy, spreading drooping habit making it fine for tops of walls, banks, etc.

NANDINA DOMESTICA—HEAVENLY BAMBOO—IN NURSERY ROW. Broad-leaved evergreen, taking gorgeous autumnal colors; pinkish white flowers and coral red berries.
J. B. PILKINGTON, PORTLAND, ORE.

CORNER PLANTING. DAPHNE, JAPAN HONEYSUCKLE, EUONYMUS. All evergreens of moderate growth, attractive throughout the entire year though requiring little attention.

Daphne Odora, pink flowered, medium $2.00, large $3.00.

The sweetest flower of all, in clusters of little trumpet shaped florets, light pink inside and carmine pink outside, coming in late winter and early spring. Growth is compact and heavy, attains good size, with rich glossy evergreen foliage, usually with narrow marginal white stripe.

Erica—Heather-Heath—

We only grow the Ericas or Heather and Heath varieties that have proven hardy and satisfactory here. Successful Landscape Architects are using them more and more. They are helpful in many ways in making effective gardens.

WILSON'S BARBERRY—A FINE SHRUB

**Escallonia**, Macrantha Rosea, larger, $1.50...18-24 1.00

**Escallonia**, Macrantha Rubra, larger, $1.50...18-24 1.00

**Escallonia**, Langleynsis, new pink, hardy, good...18-24 1.50

**Escallonia**, Berteriana, white...18-24 1.00

**Euonymus**—Japonicum, evergreen, pots...10-15 1.00

**Fatsia** Japonica, Aralia...2.00

**Ilex** (Aquifolium)—The Pacific Northwest is famous for its English Holly, for as a lawn specimen tree there is nothing more attractive especially in the winter months when its masses of red berries, intermingled in the rich glossy evergreen foliage, cheer and warm up the dreary outlook. We have a fine lot of berried Holly this season, especially in the larger and specimen sizes.

- English Holly, berry bearing...18-24 2.50
- English Holly, berry bearing...24-30 3.00
- English Holly, with berries...30-36 4.00
- Larger specimens at $5.00, $6.00 and up.
- Crenata, Japanese Holly...18-24 2.00
- Variegated Holly, Silver and Gold...24-36 5.00

**Kalmia**—Mountain Laurel, Calico bush. Strong...6.00

KALMIA FLOWERS—“MOUNTAIN LAUREL OR CALICO BUSH”
AN IRVINGTON RESIDENCE, THOMPSON ST. AT EAST 32ND
Note the plant bordered entrance steps, Veronica, Abelia and Cotoneaster. Pyramidal Japanese Cypress against chimney and Lawson Cypress at corner of house. Planting limited to foundations and borders, leaving open lawn

Laurus (Prunus) Laurels and Laurustinus—
Well enough known in the Pacific Northwest to omit description. Large growing shrubs with glossy, evergreen foliage useful as specimens, in masses and for evergreen hedges. Laurustinus “Winter Flowering Laurel” blooms in late winter, large umbels of pink and white flowers especially welcome at that season. The others are more valued for foliage than flowers.

Cerasus, English Laurel.................. 15-18 .75
Cerasus, English Laurel.................. 18-24 1.00
Cerasus, English Laurel.................. 24-30 1.50
Cerasus, English Laurel, larger specimens at $2.50 to $10.00.
Lusitanica, Portugal Laurel............. 12-18 1.25
Lusitanica, Portugal Laurel............. 24-30 2.50
Laurustinus, heavy....................... 15-18 1.00
Laurustinus, heavy....................... 18-24 1.50

Peat Moss (Torf Mull)—Humus in available form, indispensable for mulching rose and flower beds, in rock gardens. Ask for descriptive pamphlet.

ENGLISH HOLLY
Specimen at 11th and Schuyler Sts. A most satisfactory specimen tree, always attractive for its waxy, evergreen foliage and bright red berries during the Fall and Winter. Also makes excellent thick evergreen hedge.

Also profitable when planted for commercial purposes. The demand during Xmas Holidays for the cut branches, with their beautiful waxy leaves intermingled with brilliant crimson berries, is always hard to supply, even at good prices.
PRUNING OF TREES AND SHRUBS

Deciduous trees and shrubs should be given a severe cutting-back or pruning when transplanted. More or less roots are always bruised and broken during transplanting, and all such should be trimmed off with pruning shears or a sharp knife, as the bark cannot heal over a rough wound. In order to insure a strong and healthy growth, as well as to cause the plant to become bushy or attain any desired shape, it is well to cut off from each branch one-third to one-half of the previous summer's growth. Fruit trees respond especially to free pruning at the time of transplanting.

The matter of when and how to prune established shrubs and trees depends upon their habits and the purpose for which the operation is performed. Shrubs that bloom early in the spring form their flower-buds during the preceding summer, and they should, therefore, not be pruned until immediately after flowering, if their flowering is to be preserved. Late-blooming shrubs flower on wood of the same season's growth, and should be pruned while dormant, in late winter or very early spring. One-third the previous season's growth may be removed. Shrubs planted in masses should be pruned regularly to induce a dense growth, and to prevent individual plants from becoming too tall, with unsightly, open branches.

The shearing or trimming of hedges should never be done later than July 1, as late cutting allows a tender new growth, which does not have time to ripen properly and consequently is liable to winter-kill. The shearing of individual shrubs to form flat topped, globe, pyramidal, or other unnatural-shaped specimens, should, as a general rule, be avoided.

How to Plant Evergreens

1) Dig hole a foot larger and deeper than ball of earth. Provide good, loamy top soil to fill around ball.

2) Set tree in hole trifle lower than it stood in nursery.

3) Fill good top soil up around ball, pack firmly with feet or settle by filling hole with water.

4) Loosen burlap at top of ball and roll back or cut off.

5) Fill hole with soil, pack firmly and leave top of ground covered with loose earth or better mulch with strawy well-rotted manure.
OREGON GRAPE—OUR STATE FLOWER—HARDY EVERGREEN—USEFUL AS SPECIMENS, IN MASSES OR IN HEDGES

Ligustrum, Evergreen Privet—
Lucidum or Shining Leaved Privet is one of the attractive evergreen shrubs. Good size, upright spreading habit, exceptionally fine leathery, dark rich green foliage, miniature lilac-like flowers in June and followed by long upright racemes of dark purplish black berries carried entirely through the winter.

Lucidum, New..................16-20, $1.00 24-30 1.50

Lonicera Nitida, Evergreen Bush Honeysuckle.18-24 .60

Lonicera Pileata, Prostrate Evergreen, new.18-24 .60

Nandina Domestica, Heavenly Bamboo........12-18 1.00

A medium size shrub, open graceful habit, evergreen bright, light green foliage in summer, taking on high autumnal colors and fading back to green in spring, valuable for specimens and masses, and charming when intermingled as a foil or contrast with the heavier and more somber leaved evergreens like Laurel or Rhododendron.

Oregon Grape, Mahonia Aquifolia—

Mahonia, Oregon Grape................................15-18 .75

Mahonia, Oregon Grape................................18-24 1.00

Mahonia, Oregon Grape................................24-30 1.50

Oregon Grape is deservedly growing in use not only locally, but east of the mountains where it proves entirely hardy, and in California and elsewhere. We can say here that “if the woods were not full of it, the yards would be” for exotics are too often preferred to worthy natives. Rich in foliage both summer and winter, they flower bright yellow in spring and bear an abundance of attractive bluish-black berries in summer and fall. Remember they are entirely hardy and plant more of them, as well as other Berberis.

Pernettya—Three varieties dwarfs.....................10-15 1.00

Photinia Serrulata, larger size $1.50........12-18 1.00

Pieris (Andromeda) Japanese......................15-20 2.00

Pyracantha, Evergreen or Fire Thorn, red berries................18-24 1.50

Pyracantha, Lelandi, orange red berries........18-24 1.50

Pyracantha, Yunnanensis, spreading habit, red berry ......................18-24 1.50

A limited number of larger specimens, $2.00 to $5.00.

Crataegus Pyracantha, or Fire Thorn, are deservedly popular for their clean upright growth and showy masses of red and orange red berries, carried into late winter.
Rhododendrons, named Hybrids, strong bushy, $5.00; larger, $6.00 to $10.00.

- Album Elegans, white
- Chas. Dickens, red
- Chas. Bagley, deep red
- H. W. Sargent, red
- Kate Waterer, pink
- Boule de Neige, white
- Mad. Carvalho, white
- Gen. Grant, deep pink
- Prince C. de Rohan, early pink
- H. H. Hunnewell, pink
- Blandyanum, dark pink
- Lady Claremont, deep pink
- Lady Armstrong, light pink

**Rhododendron, Pink Pearl**, finest of all; enormous size clusters, brilliant shell pink; fine foliage; large plants well shaped, with buds, $10.00, $12.50 and $15.00.

- Pink Pearl, small plants, few buds: $5.00
- Pink Pearl, medium plants, some buds: $7.50

**Rhododendron Ponticum**......18-24, $2.50; 24-30, $3.50

**Veronica**, Traversi, bushy growth: $.50

**Veronica Thymifolia**, hardy dwarf, compact, round: $.50

**Veronica Cupressoides**, Cypress like, medium: $.50

**Viburnum Odoratissimum**......18-20 1.50

**Viburnum Odoratissimum**, bushy: 24-30 2.50

These are very attractive and showy; bright glossy dark green leathery foliage, showing garnet red in winter with large panicles of fragrant white flowers.

**Viburnum Rhitidophyllum**......18-24 1.50

**Viburnum Tinus-Laurustinus**.....12-18, $1.00 18-24 1.50

**BOXWOOD BORDERS EAST ANKENY AND 33RD STREETS**
Photograph in August exactly one year from planting. We can supply this in many sizes both globe and pyramidal form. See page 3
A GRACEFUL DROOPING HIMALAYAN CEDAR

CONIFERS—EVERGREEN TREES

These are largely used as specimen lawn trees, in pairs to mark walks and entrances, for massing, windbreaks, screens, hedges and as backgrounds for planting flowering shrubs and trees, and of late years for foundation plantings around house or buildings especially at corners. Many associate the word “evergreens” with simply cedar or our native fir trees without realizing the diversity of color and form which can be had in these, ranging from every shade of green and blue foliage to garnet and yellow, golden, silver and white tipped, giving even summer tints to the desolate winter landscape.

Always dug with ball of earth and burlapped. We transplant and root prune them frequently, which practically insures successful transplanting, even of the larger specimens of which we have a limited number of large size specimens from 4 to 8 feet high in Abies, Cicilica, Concolor and Nordmanniana; Lawson’s Cypress; White, Englemann’s, Norway and Colorado Blue Spruces, and will gladly make special quotation upon any in which you may be interested.

Abies (Firs)—
A class of rapid growing trees of extreme hardiness and thriving in exposed situations. They are of great decorative value but need plenty of space for their best development.

- Plumosa Aurea, Golden Plume, same sizes and prices.

- Squarrosa, Moss Cypress —
  15-18 in. 2.00
  18-24 in. 2.50

Cryptomeria Elegans, Japan Cedar—
A beautiful, rather fast growing evergreen with delicate green foliage and graceful habit. The color changes to a rich reddish brown in winter and fades back in spring.

- Cryptomeria Elegans, Japan Cedar —
  18-24 in. 2.00
  24-36 in. 3.00
**Juniperus, Juniper**

A group embracing a large variety of sizes, form and habits and distinctive characteristics of foliage and color. Excellent for specimens, and the prostrate or trailing forms are fine for rockeries, sloping banks, or low masses against foundations or in front of large beds, as borders.

Taxus (Yews)—
The English Yew is broad and spreading, responds readily to the knife and can be trained or carved to special shapes or forms. The Irish are fastigiate, or compact and columnar, of very slow growth, but rich deep color and are favorites for specimens as entrances, formal effects and special needs.

  - 48-60 in. 6.00
DECIDUOUS ORNAMENTAL TREES

The following list of deciduous trees (those that lose their leaves in autumn) embraces a selection for all purposes. For street planting, the Norway Maple probably leads in general suitability, with several other varieties of Maples, Elms, Birches, Horse Chestnuts, Tulips, Mountain Ash and others, all favorites; while for lawn and park planting this varied list covers trees of every characteristic in outline and habit, color of foliage and floral diversity.

These trees have been grown from seedlings in my nursery, have been transplanted each a number of times, according to size, will transplant readily and take vigorous hold and grow well when moved to permanent locations. Prices are for different sized trees, and in all cases good value will be given, according to price charged.

As a street or curb tree, Norway Maple easily holds first choice. Park departments, city foresters and landscape architects unite in giving it first position, as it easily combines the greatest number of desirable qualities, it withstands extremes of drought and excessive moisture, does not lift or break sidewalks or curbs thriving in limited soil, of clean, upright and rather compact growth, not affected by city smoke or gases, and holding its foliage late, then dropping its leaves in a comparatively short space, making labor of cleaning up in the fall of little effort. For a small flowering tree for curb or in lawn Pauls Double Scarlet Hawthorne probably is first favorite.

**Mountain Ash Berries—Rowan Tree**
SPIREA VAN HOUTTEI—VAN HOUTTE'S BRIDAL WREATH
One of the most satisfactory and showy of the really hardy shrubs. Plant in rows, groups or singly

DECIDUOUS ORNAMENTAL SHRUBS

Flowering shrubs take predominance in all plans for landscape decoration, grounds large or small. Without shrubbery no landscape can be created, but with a careful selection, properly planted, any property can be enhanced in beauty and value. If care is given in selecting, flowers can be had from early spring to late fall. It is my aim to produce everything in flowering shrubbery that is useful, hardy, and worthy of cultivation in this climate. I have been bringing in, trying out and rejecting different shrubs for many years past, adding to my list only those of proven merit in the Pacific Northwest. My stock is large, well grown, every plant being bushy and well furnished in proportion to its height and with exceptionally fine root system. Where no sizes are quoted, prices are for large, well grown shrubs, that will give immediate effect and flower the first year after planting.

**Japan Maple** (Acer Palmatum)— Size-in. Each
- Cut Leaf Red............................... 16-20 $4.00
- Ribbon Leaf Red........................... 18-24 4.00
- Broad Leaf Red............................ 18-24 4.00

Stock quite limited—a few extra size, $15.00 to $25.00.

**IMPORTED GRANULATED PEAT MOSS**

Comes in Bales
Like This.
Look for triangle trade-mark.

HUMUS ADDED TO YOUR SOIL INSURES UNIFORM MOISTURE
CYPRESS ALUMI—ERECT BLUE—4 TO 5 FOOT SPECIMENS

Undoubtedly first choice in ornamental trees. Can be supplied in many sizes. Prices lowered this year. See page 12

Althea—
- Rose of Sharon, Ardens blue... .24-36 .75
- Rose of Sharon, Boule de Feu—Red... .24-36 .75
- Rose of Sharon, Jeanne d'Arc—White... .24-36 .75
- Rose of Sharon, Lady Stanley—Bluish Wh... .24-36 .75
- Rose of Sharon, Rubra plena—Dbl. Red... .24-30 .75

The Altheas or Rose of Sharon are strong, erect-growing shrubs, supplied in many colors and blooming in late summer and early fall, when most shrubs are out of bloom and color in the yard is especially welcome.

Almond, Flowering. Pink, double... .30-42 1.00
Almond, Flowering, White, double... .30-42 1.00

Aralia, Hercules Club—strong plants... 1.00

Azalea—
- Southern Oregon—sturdy plants, $2.50, large... 3.50
- Evergreen Crimson, medium $1.50, larger... 2.50
- Viscosa, Flame or Swamp... 2.00
- Altadarence, yellow—medium, $2.00; larger... 3.00
- Mollis—pink and salmon colors... 2.00

Azaleas are the most showy and gorgeous of dwarf and medium growth shrubs, effective when planted with other shrubs, they are even more so when massed. The Southern Oregon is our finest native shrub, growing to large size in time. Flowering in large clusters, white or light rose, fragrant in late May. The Evergreen Crimson, which we introduced years ago from Japan, and which we propagate in quantity since the federal embargo stopped importations, is dwarf in habit, light delicate glossy foliage in spring and bright purplish garnet in winter, flowering dazzling crimson in spring. Azalea Alta-Clarence has large foliage, deciduous, taking on wonderful autumnal colors, and masses of bright yellow flowers in spring.

LAWN GRASS SEED

Cocos Creeping Bent (Agrostis Stolonifera Maritima),
1 lb. $2.50

We are sole retail distributors for Oregon for the genuine Cocos Creeping Bent, introduced by Mr. Lyman Carrier, renowned Agronomist. The lawn at our Durham nursery was remade with Peat Moss and this Grass Seed, using three pounds of seed to one thousand square feet. See the lawn and judge for yourself, color, uniformity, springiness. See lawn of Mr. L. G. Woerner, 28th and Alameda, also the greens at Portland Air Port, Columbia and Riverside Golf Clubs. We also supply Winter Blue Grass (Poa Bulbosasa) at same price.
### RESIDENCE REED COLLEGE DISTRICT

Note vines on home and the border planting leaving open lawn space.

Hydrangea—
Arborescens, Hills of Snow 24-36 .75
Paniculata 24-36 .75
Paniculata Grandiflora 24-36 1.00
Paniculata Grandiflora, tree form 1.50
Oak Leaved, fine autumn foliage 24-36 1.50
Japanese or Hortensia, blue, pink, white and others 24-36 .75
Hortensia Domoti, novelty, semi-double flowers of lavender white, free flowering 1.00

The Hydrangeas are among the most satisfactory shrubs, the Hortensia type are very showy in late spring and early summer, thrive in shade or on north side of house. Hydrangea Paniculata grandiflora “Peegee,” either tree form or bush, flowers from mid-July until early fall, first creamy white and fades to deep pink. The Oak-Leaved flowers also, but is especially valuable for its rich autumnal foliage.
AIRPLANE VIEW, AT ELEVEN HUNDRED FEET ELEVATION, JUNE, 1924, OF NURSERIES AND PROPAGATING DEPARTMENT, DURHAM STATION, OREGON ELECTRIC RAILWAY, TWELVE MILES SOUTH OF PORTLAND, SHOWING GENERAL ASSORTMENT OF HARDY ORNAMENTAL NURSERY STOCK. PURCHASERS INVITED TO VISIT NURSERIES AND MAKE SELECTIONS.

AIRPLANE VIEW OF NURSERY ON TUALATIN RIVER
Hypericum—
Calycinum, Aaron's Beard, low growing.... .50
Henryii, new, very fine, hardy, bush form 1.00
The Hypericums are nearly evergreen, bear quantities of attractive yellow flowers over a long season in late spring and summer. The new shrub type, Henryii, is a strong four-foot shrub, very free flowering, that will be extensively planted when better known.
Kerria, Japonica Flore Plena or Globe Flower .75
A medium sized shrub with attractive bright green branches and foliage bearing rose like bright double yellow flowers in early spring and moderately throughout the summer. Quite hardy and worthy of extensive planting.
Privet (Ligustrum)—
California, Ovalifolium........................large .75
Golden, fine for color contrast in foundation, base and mass plantings, two year plants .75
Regels—attractive white flowering........36-42 .75

Lawns—Genuine Cocos Creeping Bent Per lb. $2.50
Many of the finest lawns and best golf course greens are being made with this native Oregon grass seed. Use Peat Moss and three pounds of grass seed to one thousand square feet of surface.

FOUNDATION PLANTING EAST 16TH N. NEAR SHAVER
Irish Juniper, Port Orford Cedar at front entrance. English Laurel in corner with Hydrangea, Laurustinus, Evergreen Bush Honeysuckle and Golden Privet
Spirea (Spiraea)—

The Spireas as a family are easily the first favorites in deciduous shrubs. Anthony Waterer is a dwarfish bushy plant of attractive foliage, flowering reddish pink and fading to light pink, blooming over a long period in late spring and summer. Thunbergi (Japanese) is one of the first white flowers in early spring and one of the last to lose its foliage in December. Ideal for base planting and massing about the house, and Van Houtte's Bridal Wreath with its masses of drooping white flowers in May and June is probably the most extensively planted flowering shrub in America, thriving everywhere. Aitchisoni is very tall, with Mountain Ash like foliage and long spikes of creamy white flowers suitable for tall background and mass planting. Prunifolia Flore Pleno, the true Bridal Wreath is fine in flower and especially good for its rich autumn foliage.

HARDY VINES AND CLIMBERS

The need of vines and creepers for home embellishment is well known, as nothing adds more grace and beauty to the exterior of the house than well-placed and appropriate vines. They cover porches and pergolas, give shade, comfort, perfume and flowers. A porch without a vine always appears desolate and incomplete. Also invaluable for converting offensive looking fences or other unsightly features into things of beauty. In shaded places and beneath old trees where grass will not grow they are often used as a ground cover. On steep slopes and banks they prevent erosion. Churches, depots, factories, outbuildings and all brick and stone edifices can be covered by clinging vines, without trellis work, that will relieve their harshness or lack of architectural beauty and make them things of beauty and joy forever.

Wisteria—
- Strong-growing, free-flowering climbers. They are hardy and ornamental, but require deep, rich soils and the occasional use of fertilizers, to obtain best results. When well established, a greater abundance of the lovely flowers can be had by rather severe pruning, cutting back the lateral shoots to short spurs and heading back the leaders conveniently, taking care, however, not to over-do it. The grafted Japanese varieties are strongly recommended as superior to the seedlings.
- The new Pink Wisteria was grafted with scions of a fine bright pink, long full panicles, from a notable Pasadena garden. We are propagating it locally and have strong thrifty plants for this season.

Wisteria—Multijuga, Japanese Wisteria, grafted purple 1.50
- Multijuga Alba, White Japanese, grafted......... 1.50
- Multijuga, Huntington's Pink, new................ 2.50

The planting of trees and shrubbery is not an expense for they enhance real estate values, which makes their purchase a safe and sure investment.

Peat Moss (Torf Mull)—Humus in available form, the greatest of soil conditioners. We are Oregon Distributors of G. P. M. brand, imported from Europe, cheapest and best on the market. Ask for descriptive pamphlet and price list.
HEDGE OF EVERGREEN ENGLISH LAUREL E. 17 N. & KNOTT
One of our best hardy evergreens for hedges, foundation or group plantings. Supplied in many sizes, listed page 7

HEDGE PLANTS AND LIVE FENCES

The garden craftsman, if he is a true artist, will let Nature make his fences. Old dead walls and stiff fences are becoming obsolete among people of good taste. Anyone who has seen a rightly kept hedge of Privet, English Laurel, Oregon Grape, Holly or Roses, knows what an important feature it is in making truly beautiful grounds.

For medium-sized formal hedges the Privet is probably the most satisfactory—a good grower, responds readily to the pruning knife; is the most economical in cost, perfectly hardy, and practically an evergreen with us. English Laurel and Lawson’s Cypress are also fine for formal sheared hedges. For the high hedges, screens or windbreaks, Norway Spruce, Lawson Cypress and the Hemlock are all desirable; the Norway Spruce especially being sturdy, fast-growing and very handsome. These conifers are best pruned or sheared just as new growth starts in spring.

For the untrimmed hedges—those allowed to grow naturally with but little or no pruning, and which in many localities are now a favorite means of enclosing flower and vegetable gardens, edging terraces and defining roads and walks, covering unsightly defensive barb wire or picket fences—nearly any free-growing shrub can be used, such as Spireas, Van Houttes or Thunbergi, Oregon Grape, Abelia, English Laurel, Laurustinus, Cotoneasters and many others.

Boxwood is increasing in popularity, both the dwarf used for formal borders and edgings, and the tree or bush box for large size permanent hedges. Boxwood is priced on page 3 and illustrated on page 10.

PERENNIALS AND HARDY FLOWERS

Beautiful, hardy plants, that will flower year after year without replanting each spring or fall, are growing into popular favor, and the so-called "old-fashioned garden" is to be found everywhere.

The pleasures from a garden of such flowers planted by itself or especially when grouped in front of or among taller growing, hardy permanent shrubbery, cannot be fully described; caring for them is a change and relaxation. They require no skilled or heavy labor, and repay gloriously the attention bestowed upon them.

The following list covers plants that have proven satisfactory in the Northwest. My aim is to supply the best quality of strong, field-grown stock that will give immediate results.

Fall is the best time for planting Peonies, Japanese Lilies, Iris, etc., though they, and all perennials, can be planted any time until late spring, but best results are to be had from early planting.

Strong, Field Grown Clumps that give satisfaction.

ROSES

Strong Field Grown Two-Year-Old Plants That Give Results

Abbreviations used in descriptions are: H. P., Hybrid Perpetual—vigorou, hardy, flowering in Spring and Fall; require less care and attention than other classes. H. T., Hybrid Tea—more vigorous in growth, free flowering, fine colors; the most satisfactory class for the Pacific Northwest. T., Tea or Everblooming—less vigorous, more tender, finest of flowers. Poly., Polyanthus—fine class of small flowered climbers or pillar roses. Noi., Noisette—rather tender climbers, flowers usually in clusters. G. M., Gold Medal—the Highest Award of Merit given by the National Rose Society of England. Pert, Pernet—Ducher Austrian Briar Hybrids.

These plants are large for mailing unless cut back, though they can be sent this way if desired, in which case add 10 cents for single plants for postage; 20 cents for six, and 30 cents per dozen, in Oregon and Washington, points more distant pay a little more. We pack securely for shipment by express anywhere without extra charge, purchaser paying express charges, which are very light on nursery stock of all kinds.

Brief Cultural Instructions

PLANTING.—If the situation be not too much exposed where the Roses are to be set out, we prefer fall planting for all hardy kinds. Dormant plants set out in the spring should be planted early, for no plant suffers more from being set out late than the Rose. The plants should be put in friable, rich soil, and firmly pressed in with the foot, taking care not to bruise the roots. Budded roses should be planted sufficiently deep, so that the junction of the bud with the stock is from two to three inches below the surface of the earth. We cannot too forcibly direct attention to the above rule.

PRUNING.—This operation is best performed during March. Most Roses do better if moderately pruned; some sorts require two-thirds of the past year's growth removed; for others to remove one-half or one-third is sufficient. All must be more or less pruned when planted; do not neglect this. As a general rule, the more vigorous the variety the less it should be pruned. All weak or decayed wood should be entirely cut out, and also any shoots that crowd the plant, and prevent free entrance of light and air. Besides spring pruning, many kinds Hybrid Perpetuals require to be pruned as soon as their first blooming is over, in order to induce a free display of flowers in autumn.
PROTECTION.—All Roses would be better for a light covering. This may be done by hilling up with earth; or better, by strewing leaves or straw lightly over the plants and securing them with evergreen branches, *oftentimes the latter are in themselves sufficient.*

INSECTS.—If proper attention is paid to soil, planting, watering, etc., and a few simple directions heeded, you will not often be greatly troubled. The aphis is among the most annoying foes, and particularly infests plants in houses; healthy plants in the garden are but little liable to its attacks. They can be exterminated by dusting the plants with tobacco dust while they are wet with dew, or by spraying with water in which tobacco stems or leaves have been steeped.

DISTANCE FOR PLANTING.—Distances apart for planting roses are regulated somewhat by the varieties used. Hybrid Perpetuals, Hybrid Teas and other strong growing kinds may be set three feet apart, and Teas from two to two and one-half feet apart. In planting several varieties in one bed, the stronger growing kinds should be placed in the center, or if in borders, they should be set back of the weaker growing kinds.

Silver Moon, Wich., a grand single petaled climber, pure white with yellow stamens, fine foliage .60
Tausendschon, Poly., soft pink in large clusters, good .50
The list of Fruit Trees we offer is carefully selected, for commercial and Home Orchard planting. We aim to grow the best varieties of each species and have eliminated as far as possible the undesirable kinds, for we wish our patrons to feel sure that they can be sure of obtaining varieties of proven merit. We are growers of general nursery stock and not merely dealers. Our soil is a loam that produces an exceptionally good fibrous root system that insures success in transplanting. Grown right, handled properly, sold direct with no agent's commission. The planter gets the benefit.

BOOKS

We carry the following selected works for the convenience of our customers. Will cheerfully refund the price of any book that is not satisfactory if returned in good condition within one week.

The Amateur's Guide to Landscape Gardening
48-page booklet on general landscape design of benefit to any home owner interested in improving and beautifying home grounds. Mailed for 20 cents in stamps.

Johnson's Gardener's Dictionary
Complete and up to date, covers the whole field of horticulture and floriculture in 923 pages, giving short cultural and propagation hints. Price $6.50, by mail $6.75. We recommend this.

Practical Landscape Gardening
Robert Cridland
Are You Planning
— to plant a few trees, shrubs, or hedge?
— to construct a walk, drive, pergola or garden columns; a pretty garden seat or rustic house; fountain, lily pond, swimming pool or bird bath?

Do You Want to Know
— how deep and where to plant the trees, shrubs, porch base plants?
— which flowers to use in your garden and borders?
— how to construct your walks and drives, Summer house, arches and pools?
— how to attain this or that effect, and make your home surroundings beautiful?

Then You Need This Book—Because:
It tells how to plant the 2 ft. plot, as well as the larger estate.
It gives detailed sketches showing where to plant your flower garden, rose, wild or rock garden; lawns, borders, etc.
It has planting plans telling exactly what varieties to plant for best effects.
It gives working plans showing how to construct walks, drives, pergolas, terraces, pools, fountains, garden seats and rustic houses, in fact every detail of your home surroundings.
It contains photographs of actual homes, showing the effect of different plantings, the correct and incorrect method, etc.
It will be the means of beautifying your home grounds far beyond your own expectations.

Get this book. It will save you hundreds of dollars of needless expense and much time and thought, because it is written by a landscape architect of national reputation, who tells facts that are worth money.

Handsomely cloth bound. 276 pages. Contains 91 photographs, 67 sketches and 33 plans, 19 of which are planting plans. Diagrams of plots from 40x100 feet are given. Price: $2.50 (by mail $2.65).

Garden Guide
The Amateur Gardener's Handbook
The big seedsmen and nurserymen—the most practical men in the country—recognize this book as THE VERY BEST obtainable and this accounts for the thousands of well satisfied buyers. Written by gardening experts expressly for the amateur and non-professional, therefore concise and readily understood.

Covers Every Step from Plowing the Ground to Preserving the Harvest
This book will tell you everything you need to know about your home ground surroundings, your vegetables, fruit and flower garden, trees, shrubs, lawn, etc. Covers in detail:
Growing Tomatoes, Peas, Beans, Cabbage, Celery, Beets, Corn, Onions, and all chief vegetables.
Growing fruits for the small garden or orchard; Apples, Pears, Grapes, Berries, etc.
Ornamental trees, hedges, gardens and plantings of all kinds.
Constructing hot beds, cold frames, seed boxes, etc.
How to prune and propagate; control insect pests and diseases; all about soils, fertilizers, spraying, tools, etc., and 1001 other live, up-to-date Gardening Facts, simply explained—easily followed.

The most practical and best selling book of its kind published.
"Every book sells another book."
